LIMITATIONS ON FLAT TOWING OF INFINITI VEHICLES

This bulletin has been amended to apply to all current production models. Please discard all earlier versions.

APPLIED VEHICLES: All Infiniti
APPLIED DATES: 1992-2009

SERVICE INFORMATION

This Bulletin contains important guidelines and limitations concerning towing of Infiniti vehicles with all four wheels on the ground (“flat towing”).

CAUTION: Failure to follow these guidelines can result in severe transmission or drivetrain damage. For all towing including "emergency towing" procedures refer to the Owners Manual.

1. 4WD/AWD vehicles equipped with Automatic Transmission:
   • DO NOT Flat Tow – doing so will damage internal transmission components.
   • DO NOT use a tow dolly – doing so will damage drivetrain components.

2. FWD vehicles equipped with Automatic Transmission:
   • DO NOT Flat Tow – doing so will damage internal transmission components.
   • An appropriate vehicle tow dolly MUST be placed under the vehicle’s front wheels.
   • Always follow the dolly manufacturer’s recommendations when using their product.

3. RWD vehicles equipped with Automatic Transmission:
   • DO NOT Flat Tow – doing so will damage internal transmission components.
   • An appropriate vehicle tow dolly MUST be placed under the vehicle’s rear wheels.
   • Always follow the dolly manufacturer’s recommendations when using their product.

4. 2WD vehicles equipped with a manual transmission:
   • Always flat tow with the manual transmission in Neutral.
   • Always flat tow a manual transmission vehicle facing forward.
   • Maximum speed while flat towing: 60 MPH.
   • After towing for 500 miles, stop. Start and idle the engine with the transmission in Neutral for two minutes - failure to do so may cause damage to the transmission.
