G COUPE AND SEDAN; BRAKE JUDDER

This bulletin has been amended. CLAIMS INFORMATION has been corrected. The SERVICE PROCEDURE has been amended. Please discard all previous copies.

APPLIED VEHICLES:

2007-2009 G Sedan (V36)
2008-2009 G Coupe (CV36)

APPLIED VINS:

2007-2008 G Sedan - ALL
2008 G Coupe - ALL
2009 G Coupe vehicles built between:
JNKCV(*)4(**)9M 600008 and JNKCV(*)4(**)9M 652073
2009 G Sedan vehicles built between:
JNKCV(*)1(**)9M 010111 and JNKCV(*)1(**)9M 051571
or
JNKCV(*)1(**)9M 300016 and JNKCV(*)1(**)9M 353912

APPLIED DATES:

Vehicles built before: October 6, 2008

IF YOU CONFIRM:

While braking, especially when braking at highway speeds:

- the steering wheel shakes
and/or
- the body vibrates
and/or
- the brake pedal pulsates (also known as "Brake Judder")

IMPORTANT NOTES:

- If incident occurs when cruising or coasting (not braking) it is not "Brake Judder," and may be tire/wheel related. Refer to ASIST for further diagnostic assistance.
- DO NOT CONFUSE "Brake Judder" with the rapid consistent-speed pedal pulsation that may be felt and only occurs when ABS is activated during hard braking or on slippery road surfaces. In contrast, the pedal pulsation of "Brake Judder" may occur with light to moderate braking experienced during normal driving conditions, and the pulsation rate will vary (faster or slower) with vehicle speed.
- The purpose of "ACTIONS" (on page 2) is to give you a quick idea of the work you will be performing. You MUST closely follow the entire Service Procedure as it contains information that is essential to successfully completing this repair.

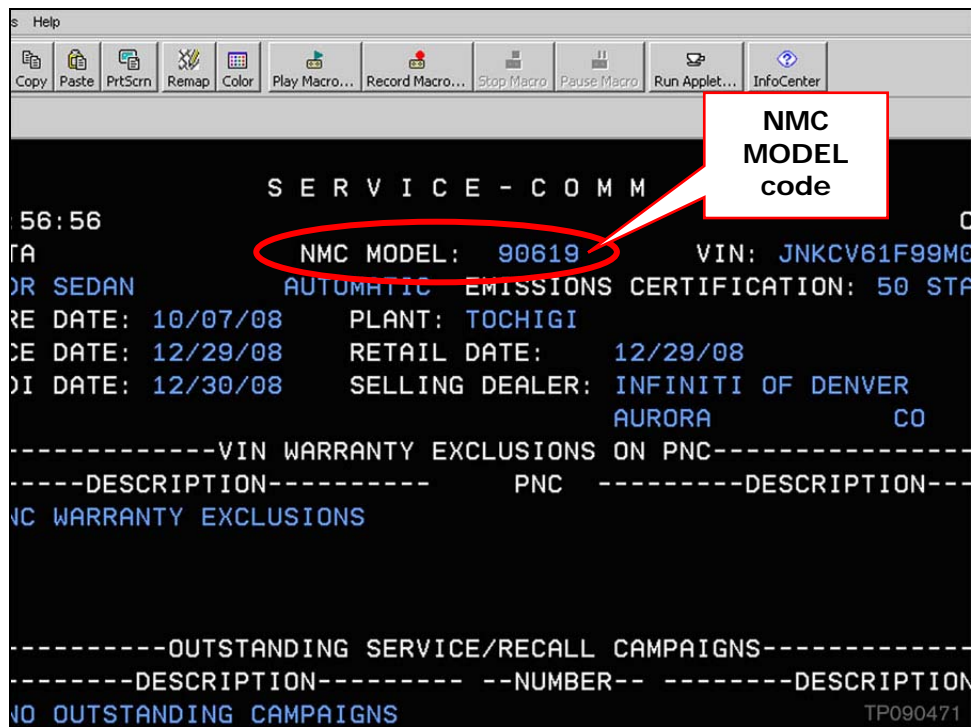

Infiniti Bulletins are intended for use by qualified technicians, not 'do-it-yourselfers'. Qualified technicians are properly trained individuals who have the equipment, tools, safety instruction, and know-how to do a job properly and safely. NOTE: If you believe that a described condition may apply to a particular vehicle, DO NOT assume that it does. See your Infiniti dealer to determine if this applies to your vehicle.

ACTIONS:

1. Identify the brake system by NMC Model Code or visual inspection.
2. Remove the front brake caliper and rotor.
3. Install the new front brake backing plate (splash guard assembly).
4. Inspect the front brake rotor to determine if resurfacing is possible or if replacement is necessary.
5. Reinstall the front brake caliper.
6. Inspect the brake pads and install the new brake pad kit and new hardware kit if replacement is necessary.
7. Perform procedure on the other side of the vehicle.

IDENTIFY BRAKE SYSTEM BY NMC MODEL CODE

1. Log onto SERVICE-COMM and locate the vehicle's 5-digit "NMC MODEL" code (see Figure 1).
 - Right down the NMC MODEL code.
 - This number will be compared to the **NMC MODEL CODE/PISTON TYPE CHART** on page 5 to determine which brake system you are working with and which parts you will use.

IDENTIFY BRAKE SYSTEM BY VISUAL INSPECTION

This information will be compared to the **NMC MODEL CODE/PISTON TYPE CHART** on page 5 to determine which brake system you are working with and which parts you will use.

1-Piston Type

2-Piston Type

4-Piston Type

SERVICE PROCEDURE

1. Remove the front brake caliper assembly and rotor.
 - Refer to the BR section in the applicable Electronic Service Manual for removal information.
2. Install the new front brake backing plate (splash guard assembly-RH or LH) listed in the Parts Information section.
3. Inspect the front brake rotor to determine if brake rotor resurfacing is possible or if replacement is necessary.
 - Refer to the BR section in the applicable Electronic Service Manual for brake rotor inspection information.
 - Do not replace the rotors if both will measure at or above minimum thickness after resurfacing.
4. If rotor resurfacing is possible, make sure to use the ProCut PFM Series on-car brake lathe.
5. If necessary, replace both rotors with the new rotor listed in the Parts Information section. Do not replace only one rotor.
6. Reinstall the brake caliper assembly.
7. Inspect the brake pads and install the new brake pad kit and the new hardware kit listed in the Parts Information section if replacement is necessary.
 - Refer to the BR section in the applicable Electronic Service Manual for brake pad inspection and installation information.
8. Perform this procedure on the other side of the vehicle.

CLAIMS INFORMATION

Submit a Primary Part (PP) type line claim using the following claims coding:

DESCRIPTION	PFP	OP CODE	SYM	DIA	FRT
RPL Front Brake Splash Shield & Grind Rotor (2WD, Both Sides)	(1)	PX43AA	EA	43	2.3
RPL Front Brake Splash Shield & Grind Rotor (4WD, Both Sides)	(1)	PX45AA	EA	43	2.4
RPL Front Brake Splash Shield & Rotor (2WD, Both Sides)	(1)	PX47AA	EA	43	1.5
RPL Front Brake Splash Shield & Rotor (4WD, Both Sides)	(1)	PX49AA	EA	43	1.5

- (1) Refer to the electronic parts catalog (FAST or equivalent) and use the appropriate Front Rotor - Disc Brake part number as the primary failed part.

PARTS INFORMATION

DESCRIPTION	PART #	QUANTITY
Guard Assy-Splash, Fr Brake, RH	See NMC MODEL CODE/PISTON TYPE CHART, below	1
Guard Assy-Splash, Fr Brake, LH		1
Hardware Kit-Front Disc Brake Pad		1 (if needed)
Pad Kit-Disc Brake		1 (if needed)
Rotor-Disc Brake, Front		2 (if needed)
