LIMITATIONS ON FLAT TOWING OF INFINITI VEHICLES

This bulletin amends ITB99-014c. This version is expanding the MY and Applied Vehicle range and contains amended Service Information. Please discard all paper copies of the earlier bulletin.

APPLIED VEHICLES: All Infiniti
APPLIED DATES: 1992-2008

SERVICE INFORMATION

This Bulletin contains important guidelines and limitations concerning towing of Nissan vehicles with all four wheels on the ground ("flat towing").

CAUTION: Failure to follow these guidelines can result in severe transmission or drivetrain damage.
 For all towing including "emergency towing" procedures refer to the Owners Manual.

1. 4WD/AWD vehicles equipped with Automatic Transmission:

- **DO NOT Flat Tow** – doing so will damage internal transmission components.
- **DO NOT use a tow dolly** – doing so will damage drivetrain components.

2. FWD vehicles equipped with Automatic Transmission:

- **DO NOT Flat Tow** – doing so will damage internal transmission components.
- An appropriate vehicle tow dolly **MUST** be placed under the vehicle's **front** wheels.
- **Always** follow the dolly manufacturer's recommendations when using their product.

3. RWD vehicles equipped with Automatic Transmission:

- **DO NOT Flat Tow** – doing so will damage internal transmission components.
- An appropriate vehicle tow dolly **MUST** be placed under the vehicle's **rear** wheels.
- **Always** follow the dolly manufacturer's recommendations when using their product.

4. 2WD vehicles equipped with a manual transmission:

- **Always** flat tow with the manual transmission in Neutral.
- **Always** flat tow a manual transmission vehicle facing forward.
- Maximum speed while flat towing: 60 MPH.
- After towing for 500 miles, stop. Start and idle the engine with the transmission in Neutral for two minutes - failure to do so may cause damage to the transmission.
